

Truman Medical Centers – Nursing Administration
Advanced Practice Clinical Placement
Fact Sheet

Thank you for your interest in completing your clinical rotation at Truman Medical Centers. Whether you are a current employee or a visiting student, we are delighted that your education journey has brought you to TMC.

To ensure that your clinical rotation is an enjoyable and seamless experience, Nursing Administration has constructed this FAQ sheet highlighting the key policies and procedures of our Clinical Placement Program. These policies help to ensure that a consistent and fair process is practiced. Please read this information carefully as exceptions will not be made.

1. Clinical Placement Process

To be considered for placement with a TMC advanced practice provider, the student must complete and return the Advanced Practice Clinical Placement form by the deadline for the semester in which they are requesting placement to the Advanced Practice Placement Coordinator (APPC). The students' educational institution must have an active clinical affiliations contract with TMC. Students are encouraged to be as detailed as possible when completing the Advanced Practice Clinical Placement form as this will impact what preceptor and clinical area the student is potentially placed. For example, if a student is requesting Women's Health placement they should indicate if they need hours in OB and/or GYN.

Due to high request volumes, only students whose placement requests have been approved will be notified by the notification deadlines. Request made after the application request deadline will not be accepted. The application request and notification deadlines are as follows:

	Application Request Deadline	Notification Deadline
Spring Semester (January – May)	October 1	November 1
Summer Semester (May – August)	February 1	March 1
Fall Semester (August – December)	May 1	June 1

TMC employees and UMKC students who submit their request forms on or before the application request deadline will receive priority placement. All other requests are handled on a first come, first serve basis. Students may submit requests for more than one semester at a time, however, placement for future semester will not commence until on or after the application request deadline.

When submitting future requests, to ensure fair placement to all students, there is no guarantee that placement in consecutive specialties will be granted. Due to the high volume of requests, this specifically applies to Family Practice, Pediatrics, and Women's Health. For example,

placement in Women's Health for the spring and summer semesters would be considered a consecutive request.

Students who do not work through the appropriate application process will not have their requests considered. In order to be consistent, it is pivotal that all requests be handled by the APPC. Requests for IT access and badge access can only be approved by the APPC.

2. Preceptor Scheduling

If a student's placement request is granted, the student will be notified by the APPC on or before the notification deadline via email. This email will serve as a formal introduction for the student and their preceptor. It is the student's responsibility to communicate with their preceptor regarding scheduling. The student is also responsible for working with their preceptor to complete any necessary documentation required by their educational institution.

As mentioned above, it is the student's responsibility to ensure the information on their Advanced Practice Clinical Placement form is accurate. Once a student is placed, they will not be allowed to switch preceptors if the provider does not meet the requirements set forth by the educational institution.

3. Orientation and Onboarding

All non-TMC students must attend an orientation session prior to their first scheduled day with their preceptor. Available orientation dates will be shared in the notification email. At orientation, students will complete online TMC compliance modules as well as undergo IT documentation training. Badge hang-tags and parking passes will be distributed at this time. Students who do not attend orientation will not be provided IT or security access. Students who have completed orientation once will not be required to attend additional training session for future placement requests.

TMC employees will not be required to attend orientation. IT access mirroring the student's assigned preceptor will be requested by the APPC. The TMC employee/student will need to call IT at the beginning of each shift to have their access switched over to student mode.

4. Clinical Rotations

Students must work with their preceptors to establish rotation schedules. Students who are not TMC employees are required to wear their student badge with the student badge hang tag at all times. TMC employees must wear their security issued TMC badge at all times.

5. Miscellaneous Information:

While all placement requests are considered, please note that placement is made at the discretion of the APPC, Director of Advanced Practice Providers, and the preceptor. If a

preceptor must decline a previously placed request, there is no guarantee that a substitute preceptor will be assigned.

All issues or concerns regarding advanced practice clinical placement should be addressed with the APPC, Kamera Meaney at kamera.meaney@tmcmcd.org.
